TABLE OF CONTENTS

Table No	\cdot	Page No.
	Highlights	3
1.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, June	4
2.	Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-June averages	6
3.	Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, June	8
4.	Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, June	10
5.	Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-June	12
6.	Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, May, with comparisons	14
7.	Federal milk order Class I formula price information, June	18
8.	Prices and economic indexes used in Federal milk order formulas to determine June prices, with comparisons	20
9.	Federal order base and excess prices for milk of 3.5 percent butterfat content, June	21
9a.	Seasonal incentive fund excluded under various Federal milk orders, June	21
	Major order actions. June	22

FEDERAL MILK ORDER MARKET STATISTICS

Highlights

JUNE 1967

<u>Producer Deliveries</u>. A total of 123,585 producers delivered 4.2 billion pounds of milk to regulated handlers in 66 comparable markets during June 1967. This is 0.7 percent above producer deliveries in June 1966. Average daily delivery per producer increased from 1,087 pounds in June 1966 to 1,146 pounds in June of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

<u>Producer Deliveries Used in Class I.</u> The volume of producer deliveries used in Class I in 66 markets decreased 3.0 percent from last year, to a total of 2.4 billion pounds for the month of June 1967. The average utilization percentage for June was 55 percent, down from 58 percent last year. Eleven markets showed an increase in the utilization percentage, 11 showed no change, and the remaining forty-four markets showed a decrease (See table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 3.1 percent in the 66 markets for the month of June.

Minimum Prices. The weighted average Class I price paid by handlers in the 66 markets for 3.5 percent milk was \$5.97 per hundredweight, 68 cents higher than the \$5.29 per hundredweight price in June 1966. Minimum Class I prices for June were higher in all 66 markets.

Producers in the 66 markets received a weighted average blend price of \$4.88 per hundredweight for 3.5 percent milk. This is 33 cents higher than the June 1966 blend price of \$4.55. Producers received higher blend prices in 64 of the 66 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

<u>Fluid Milk Sales</u>. Total in-area fluid milk sales for June 1967 in 67 marketing areas are estimated to be about 1.9 billion pounds, 0.2 percent below such sales in June of last year. Complete May in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE .

Minimum Prices. The weighted average Class I price for the January-June period for the 66 markets was \$5.90, 55 cents higher than the \$5.35 price in 1966. The 1967 weighted average blend price was \$5.07, 41 cents higher than the blend price of \$4.66 reported for this period in 1966 (See table 2).

<u>Producer Deliveries and Deliveries Used in Class I.</u> Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first six months of this year, compared to the same period in 1966, producer deliveries for the 66 markets were up 0.8 percent, and deliveries used in Class I were down 2.6 percent. Data for the 66 markets and for all markets are summarized below:

MAJOR ORDER ACTIONS, JUNE 1967

Amendments:

Delaware Valley - June 1 (32 FR 7056, 5/10/67). A distributing plant must dispose of at least 50 percent of its Grade A'receipts on routes during the months of September through February and 45 percent during the months of March through August; and, at least 10 percent of such receipts must be disposed of on routes in the marketing area.

A supply plant must ship at least 50 percent of its receipts from producers to distributing pool plants during the months of September through February and at least 40 percent during the months of March through August. If the 50 percent requirement is met during the months of September through February, the plant has automatic pool plant status during the months of March through August. However, the automatic pool plant status of a supply plant would be canceled for any month during the March through August period that another supply plant is qualified for pooling by shipping fluid milk products to the same distributing plant(s) by which such automatic pooling was accomplished. A supply plant which does not meet the percentage requirements for pooling may be pooled if it meets the following requirements: (1) It is owned and operated by a handler who also operates a pool distributing plant, (2) it is located outside the marketing area and is not a pool plant under another Federal order, (3) the handler files a written request with the market administrator on or before the first day of September for pool status for such plant, (4) the supply plant in combination with the distributing plant meet the percentage requirements for a distributing pool plant, (5) the handler qualifies no other supply plant by actual shipments to such pool distributing plants, and (6) the handler notifies the market administrator each month with respect to any receipts from dairy farmers not meeting the health requirements for disposition as fluid milk in the marketing area.

Definition of a nonpool plant revised to include an other order plant, producer-handler plant, partially regulated distributing plant, and an unregulated supply plant. Handler definition revised to include the operator of a pool plant, a partially regulated distributing plant, and an unregulated supply plant; a cooperative association, a producer-handler, and any other person who causes producer milk to be picked up at the farm and/or moved to a plant. A producer-handler is defined as any person who operates, as his personal enterprise and at his personal risk, a dairy farm and a distributing plant, and who receives milk only from his own production and from pool plants.

Diversions by a cooperative association or a handler are unlimited during the months of March through August. During the months of September through February, a cooperative association may divert not more than 10 days' production of an individual producer's milk or not more than 15 percent of total member milk received during the month. Limitations on diversions by a proprietary handler would be the same as for a cooperative association. Amendment provides for end-of-month inventory of packaged fluid milk products to be classified as Class I; and, sour half and half and yogurt to be classified as Class II. The maximum 2 percent allowable shrinkage in Class II milk is to be allocated 0.5 percent to receiving operations and 1.5 percent to processing operations.

For the period from June 1, 1967 through June 30, 1968, the Class I pricing provisions of the order are revised to provide for the use of the U. S. Manufacturing milk price series in lieu of the present Midwestern Condensery price series as a tie to manufacturing milk values. The supply-demand adjustor would be based on a comparison of total producer receipts with producer milk classified as Class I and for the first 6 months following the effective date of this order, the supply-demand adjustor would be limited to plus or minus 20 cents. Amendment also provides for the uniform price to be announced on the 13th day of the month instead of the 15th day.

The expense of administration changed from 2 cents per hundredweight to 4 cents per hundredweight. Type of pool changed from individual handler to market wide pool. Other provisions were modified to conform to the market wide pooling arrangement.

New York-New Jersey - June 1 (32 FR 7842, 5/30/67). For the period from the effective date of this order through April 1968, amendment action adds 20 cents to the Class I price. Action also revises, for the same period, Section 1002.40 (a) (1) of the order to provide that the result computed pursuant to such paragraph shall not be less than 117.596.

Quad Cities-Dubuque - June 1 (32 FR 9150, 6/28/67). Action revises the pooling requirements for a distributing plant to provide that the volume of Class I packaged fluid milk products disposed of during the month either on routes (including routes operated by vendors) or through plant stores to retail or wholesale outlets or moved to other plants, less receipts of packaged fluid milk products from other pool distributing plants, is not less than 45 percent (40 percent from the effective date of this order through August 1967) of the total "Grade A" fluid milk products received at such plant, exclusive of receipts of packaged fluid milk products from other pool distributing plants and receipts from other order plants. Not less than 15 percent of such receipts during the month must be disposed of on routes in the marketing area.

MAJOR ORDER ACTIONS, JUNE 1967 -Continued

Amendments: -Continued

Southeastern Florida - June 1 (32 FR 7742, 5/27/67). This amendment allows, under specified conditions, Class IV classification on milk transferred or diverted in bulk from a pool plant to a nonpool plant. A Class IV classification is not now allowed on milk moved to a nonpool plant.

Suspensions:

- <u>Delaware Valley</u> June 1 (32 FR 8063, 6/6/67). This suspension action removes for an indefinite period the provision which prevented the pooling in the Delaware Valley order of producer milk which is diverted to a plant regulated under another order. This suspension also removes the provision which prices diverted milk at the location of the plant at which the milk is physically received if a greater location adjustment is applicable at the diverting pool plant. The milk will now be priced at the location of the pool plant from which it was diverted.
- <u>Delaware Valley</u> June 24 (32 FR 9006, 6/24/67). For the months of June and July 1967, the suspension allows a supply plant to be pooled under the Delaware Valley order on the basis of shipments to a distributing plant under another order which has distribution in the Delaware Valley market.
- Great Basin June 23 (32 FR 8956, 6/23/67). Action suspends for the period of June through August 1967, the provision which requires that 50 percent of an approved plant's receipts be distributed on routes during the month in order to qualify for pooling.
- North Texas and Oklahoma Metropolitan June 1 (32 FR 7843, 5/30/67). Action suspends the effect of the supply-demand adjustors to the Class I prices in these orders for the months of June and July 1967. The following 6 markets are similarly affected since their prices are based upon the above markets: Red River Valley, Austin-Waco, Corpus Christi, Central West Texas, Lubbock-Plainview, and San Antonio.
- $\underline{\underline{Paducah}}$ June 28 (32 FR 9151, 6/28/67). Action removes for the period June through August 1967, the limit on diversions of producer milk to nonpool plants that are not regulated by another order.
- St. Louis June 3 (32 FR 8022, 6/3/67). Action suspends the supply-demand adjustment to the Class I price for the period June 3 through July 31, 1967. The Ozarks, Paducah, and Southern Illinois markets are similarly affected since their prices are based on the St. Louis Class I price.
- <u>Upper Florida</u> June 17 (32 FR 8707, 6/17/67). This action suspends for the period June through August 1967, all limitations on the diversion of producer milk to nonpool plants.
- Western Colorado June 23 (32 FR 8956, 6/23/67). Action suspends for the period June through September 1967, the diversion provisions under which a handler, including a cooperative association, may not divert milk in an amount in excess of 60 percent of its member producer milk received at all pool plants during April, May, June, and July, and 30 percent in other months.
